Summary

Highly skilled and versatile Business Analyst and Developer with expertise in Python, Java, C/C++, and a wide range of modern technologies including the MERN stack, ASP.NET MVC, and Flask. Solid foundation in both business analysis and development, with experience in API integration, bot development, machine learning, and data analysis. Proficient in REST and SOAP APIs, along with hands-on experience working with databases such as MySQL, MongoDB, and SQL. Able to effectively bridge the gap between business needs and technical solutions.

Currently contributing to iAssist Innovation Labs Pvt Ltd, automating business processes, developing advanced bots, and utilizing machine learning algorithms for actionable insights. Specialize in developing solutions that streamline processes, enhance operational efficiency, and drive business success.

Experience

iAssist Innovations Labs
IT Analyst
August 2024 - Present (2 years 2 months)

EY
Intern
February 2024 - June 2024 (5 months)
Noida, Uttar Pradesh, India

I implemented robust user authentication for over 1,000 users and integrated various APIs to enhance functionality, including OpenStreetMap for real-time location search and navigation, and a currency exchange API for live currency conversion. I developed a visitor count system using databases and text files and improved site efficiency by 30% through Apache Solr for web search functionality. I created dynamic galleries and dashboards with AM Charts,

ensuring a seamless user experience. Additionally, I tested the Mahakumbh website for responsiveness, consistent appearance, and quality of images and videos. I also developed features for filtering content by date, integrated Juicer App for social media feeds, enabled content sharing across various platforms, and load-tested the site to handle high user traffic.
